

Giacomo Saccaggi

DATA SCIENTIST | MLE

I built and implemented robust AI/ML systems, managing the entire process from development to production. I am passionate about solving complex problems and I am responsible for technically coordinating and mentoring other people to drive successful project delivery.

COURSES

The Complete Cyber Security Course	
Station X LTD.	Ongoing
Natural Language Processing	
Profession AI	2022
Data Analyst to Data Scientist	
Aspire Journeys	2021
Arduino from basic to advanced	
Fablab Milano	2019

EXTRA

- Hobby Farmer at the Family's Agricultural Business.
- IoT Hobbyist developing custom Smart Devices.
- Licensed Sailor with skippering/crew experience.

WORK EXPERIENCE

Sr. AI/ML Data Scientist

Lugano, Switzerland

April 2022 – Ongoing

- Leading as the Technical Owner of a strategic data pipeline designed for audience measurement in a cookieless environment. This solution, which integrates census and panel data, is a cornerstone for the evolution of core products like Digital Content Ratings (DCR) and Digital Ad Ratings (DAR), and enables secure partner integrations via Data Clean Rooms. And created LLM models with Contrastive learning to clean log data to create session level.
- Collaborated on the creation of Artificial Intelligence Agents that allow users to query product data using natural language. This initiative provides on-demand insights, simplifies data analysis, and improves information accessibility for internal stakeholders.
- Contributed to the development of automated monitoring systems to proactively identify issues and anomalies on digital platforms, enhancing overall platform stability and reliability.

Data Scientist

Milan, Italy

November 2020 - April 2022

- Played a key role in designing and developing an intelligent automation platform for a leading energy company. My contributions focused on building a complex model using NLP, Computer Vision and OCR (for ID badge recognition). This work was a central part of a strategic €7 million project.
- Contributed to a proactive monitoring system for a major national logistics provider. I was responsible for developing the predictive models that analyzed KPIs and triggered an automated alert system, which was integrated with a user-facing chatbot.
- Developed a machine learning model for a global streaming service to forecast and mitigate user service errors. The model analyzed various technical and network-related indicators to predict potential issues.
- Built an outlier detection model to identify anomalies in real-time sensor data from a naval fleet, directly contributing to the enhancement of predictive maintenance efforts.

Intern Data Scientist

Saronno, Italy

May 2020 - November 2020

- Application of statistical, mathematical, and machine learning methods to analyze and optimize monitoring software for a big company in the publishing industry.
- *** Prior experience during university includes roles as a Data Analyst, Web & Software Developer, and several business internships.

EDUCATION

Bachelor's Degree,	Master's Degree,
Quantitative Methods	Statistics and Economics
Catholic University of Milan	Bicocca University of Milan
2014/2015 – 2016/2017	2017/2018– 2018/2019

CERTIFICATIONS

- ★ Microsoft Azure AI Fundamentals AI-900
- ★ Elaborazione del linguaggio naturale in Microsoft Azure
- ★ Computer Vision in Microsoft Azure
- ★ Intelligenza artificiale su Microsoft Azure
- ★ Microsoft Azure Machine Learning
- ★ Digital Transformation with Google Cloud

In compliance with Italian Legislative Decree no.101/2018 and Reg. UE 679/2016, I hereby authorize the recipient of this document to use and process my personal details purpose of recruiting and selecting staff and I confirm to be informed of my rights in accordance to art. 7 of the above-mentioned decree.
